STRENGTHS

1. Excellent problem-solving skills with a keen eye for detail.
2. Eager to learn new technologies and consistently enhance technical skills.
3. Ability to work under pressure and meet deadlines.
4. Effective team collaborator, adaptable to fast-paced environments.

CERTIFICATIONS

- Udemy React Certificate
- GitHub Certificate
- Bootcamp on AR/VR By CDAC
- Cisco Python Certificate
- Frontend Internship Certificate

TECHNICAL SKILLS

Technology / Language	Expertise Level	Summary
Core,Advanced Java	Skilled	Extensive experience in various projects, proficient in handling practical issues and advanced concepts.
Python	Skilled	Hands-on experience in project development and problem-solving with a deep understanding of core concepts.
HTML,CSS,JS	Skilled	Built responsive and interactive websites, familiar with the best practices for front-end development
MySql	Skilled	Proficient in database design, querying, and managing databases in real-world applications.
MongoDB	Skilled	Strong experience with NoSQL database operations, integrating it within full-stack applications.
ReactJS	Intermediate	Developed dynamic and efficient user interfaces, familiar with state management and component-driven development.
AngularJS	Intermediate	Familiar with the MVC architecture and directives; explored basic data binding and component creation through tutorials and sample apps.
ExpressJS	Intermediate	Hands-on experience in building backend services and APIs, understanding routing and middleware.
NodeJS	Intermediate	Practical knowledge of server-side application development with asynchronous programming in Node.js.
C/C++	Intermediate	Strong understanding of algorithms and system-level programming concepts.
GitHub	Intermediate	Experience with version control, repository management, and collaboration on team projects.
Flutter	Basic	Exploring mobile development with Flutter, building simple apps and understanding the core framework.

PROJECTS

1. SuvarnaRup − Jewellery Ecommerce Website | Link
Designed and developed a full-stack jewellery e-commerce system with Admin and Client roles. Personally implemented user authentication using JWT, product CRUD operations, and PayPal payment integration. A key challenge was securing role-based routes and real-time payment handling, which I resolved through independent research on Express middleware and the PayPal API.
Technologies Used: ReactJS, Tailwind CSS, Redux, Node.js, Express.js, MongoDB, JWT, Postman,PayPal API

2. Personal Website | Link
Designed and developed a responsive personal portfolio to showcase my projects, skills, and academic background. Focused on creating a clean and user-friendly interface with smooth navigation across sections like About, Projects, and Contact. A key challenge was managing component states efficiently, which I overcame through independent research and structured implementation.
Technologies Used: ReactJS, Tailwind CSS, Redux

3. Electronic Device Billing System | Link
Developed a desktop billing system to manage customers, products, billing, and reports. I worked on the Java Swing interface and backend integration with MySQL, ensuring accurate data handling and user-friendly design. A key challenge was linking the GUI with the database, which I solved through independent research on JDBC and event-driven programming.
Technologies Used: Java, MySQL, NetBeans IDE
